Summary

A freelance fullstack developer leveraging cutting edge technologies in web application development with a focus on MEAN & MERN stack. I have a great understanding of building secured enterprise applications using cloud based architectural designs for deploying and running distributed applications that conforms to the business IT compliance policies.

Software Developer talented at translating customer requirements into testable engineering plans. Maintains exceptional development quality from conception through distribution. Works alongside clients and colleagues through all stages of development to produce exceptional final products.

Highly skilled software development professional bringing enormous talents for software design, development and integration. Background writing code and developing systems for web applications.

Detail-oriented, organized and meticulous employee. Works at fast pace to meet tight deadlines. Enthusiastic team player ready to contribute to company success.

Professional Experience

Freelance Software Developer jan 2021 - current

Personal project and Open Source

- Updated old code bases to modern development standards, improving functionality.
- Collaborated with senior developers to select ambitious, but realistic coding milestones on pre-release software project development.
- Discussed issues with other members to provide resolution and apply best practices.

- Participated in software field testing to verify performance of developed projects.
- Integrated design feedback to build and maintain user-centered software applications.

Education

Federal University of Technology, Akure. oct 2021 - present
Bachelor of Science in Quantity Surveying Engineering

Skills

Programming Languages

Javascript
TypeScript

Frameworks

React
Next
Angular
Node (Monolith & Microservices)
Express

Sample Tools & Libraries

- AWS • GrapgQL • Github • Redux • ExpressJS • Redux • Postman
- RestAPI • Docker • Material-UI

Databases

- MongoDB
- PostgreSQL
